(54) Title: MEDIA FILE REPRODUCING SYSTEM AND METHOD THEREOF

(57) Abstract: Disclosed are a media file reproducing system and a method thereof capable of easily reproducing a media file inside a file server that does not provide a UPnP content directory service (CDS) through a UPnP media renderer connected to a UPnP-based network. The media file reproducing method comprises: receiving position information of a filer server that provides a file transfer protocol service and a distributed file service through a media server connected to the UPnP-based network; and reproducing the media filed inside the file server through the media renderer connected to the UPnP-based network based on the position information.
